The subject matters of claim 1 appears to involve inventive steps in view of the document 1 to document 3.

The technical feature "the intermediate plate communication holes in communication with the refrigerant passing outward bulging portion being held in communication by communication portions formed in the intermediate plate, the communication portions and the communication holes thereby held in communication providing a refrigerant passageway for causing the refrigerant to flow therethrough longitudinally of the refrigerant passing outward bulging portion, the communication portions being adjusted in width to alter the cross sectional area of the refrigerant passageway along the lengthwise direction of the passageway" are not disclosed in any of the documents cited in the ISR.

The subject matters of claim 1-11 are neither disclosed in any of the documents cited in the ISR nor obvious to a person skilled in the art.
